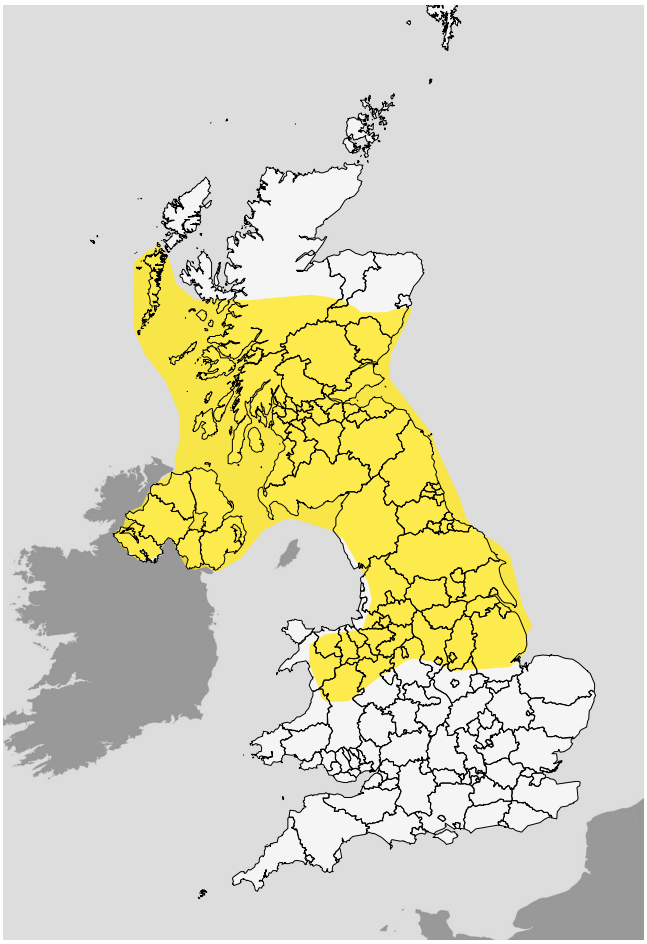
Yellow warning
Ice

Between
16:00 Wed 1 Jan 2025 and
10:00 Thu 2 Jan 2025



Icy surfaces leading to some difficult travel conditions.

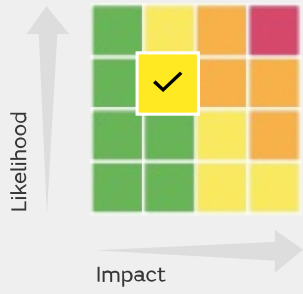
What to expect

- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

A band of rain, sleet and hill snow will clear southwards during Wednesday afternoon and evening. As skies clear in its wake, and with standing water following earlier rain in places, ice is likely to form quite quickly on untreated surfaces, leading to difficult travel conditions. Wintry showers are also likely along some north-facing coasts overnight, increasing the chance of ice in places.

What should I do?
Keep yourself and your family safe when it is icy. Plan to leave the house at least five minutes earlier
than normal.



Medium likelihood of low impacts

Issued at 10:42 Wed 1 Jan, 2025

Yellow warning
Ice

Between
16:00 Wed 1 Jan 2025 and
10:00 Thu 2 Jan 2025

Further Details (continued)

Not needing to rush, reduces your risk of accidents, slips, and falls.

If you need to make a journey on foot, try to use pavements along main roads which are likely to be less slippery. Similarly, if cycling, try and stick to main roads which are more likely to have been treated.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

Be prepared for weather warnings to change: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
